INFOCEUTICALS

BIOENERGETIC MINERAL DROPS

Clear instructions for your cells, *carried with minerals.*

Every cell in your body is receiving instructions right now. How to make energy. When to repair. When to rest. Those instructions run through your body's control system, the body-field. Stress, toxins, injuries and emotions scramble the signal. When that happens, your body spends more energy and gets less done. An Infoceutical is a message for your body. It carries the right information, imprinted into a blend of water and full-spectrum minerals. You add the drops to a glass of water, and your body gets clearer instructions to work from.

THINK OF IT THIS WAY

Your body runs on an energy control system, a bit like the operating system on a phone. Food and supplements supply the raw materials. Infoceuticals supply the instructions for using them well.

WHAT'S IN THE BOTTLE

Purified water and a full-spectrum ionic trace mineral concentrate, imprinted with a specific information pattern. No herbs, stimulants, hormones or drugs.

WHERE INFOCEUTICALS CAME FROM

The research

Australian scientist Peter Fraser spent decades mapping how information flows through the body, charting hundreds of systems, organs and functions.

The first bottle

Harry Massey, worn down by years of exhaustion, worked through dozens of early Infoceuticals with Peter and got his energy back. Together they founded the company now called Energy4Life.

Today

More than two decades later, a library of over 70 Infoceuticals is used by practitioners in more than 20 countries, chosen for each person by a short scan.

HOW THEY'RE MADE AND USED

1 Mapped

Each Infoceutical matches one part of the body's information map, such as cellular energy, circulation or the nervous system.

2 Imprinted

Light and magnetic fields structure the mineral water so it holds that pattern. A 10,000-volt electrostatic charge helps the imprint stay stable.

3 Taken daily

Your practitioner's scan picks your top Infoceuticals. You take the drops in water once a day and re-scan every 3 to 4 weeks.

THE RESEARCH

Study performed at UC San Diego

≈37% less oxidative stress measured in heart cells

Higher mitochondrial reserve capacity, the cells' energy in the tank

1,139 genes shifted in activity

Peer-reviewed cell-culture study performed at UC San Diego, published in the journal EXPLORE (Ranaweera et al., 2025). Results in cells are not a promise of individual outcomes.

THE MINERAL FORMULA

Full-spectrum minerals, *in natural balance.*

Every Infoceutical is made with purified water and a natural full-spectrum ionic trace mineral concentrate. Together, the water and minerals give the imprinting process a clean, supportive base, and they add nutritional value through a naturally balanced range of minerals.

99%

WHY WATER MATTERS

By molecule count, your body is about 99% water. Research by Dr. Gerald Pollack shows that water next to cell surfaces organizes into a structured, charged layer that stores energy, a bit like a battery. Energy4Life imprints Infoceuticals in structured water for this reason: it holds information more coherently.

Mg · K · Na · Cl

WHY MINERALS MATTER

Water alone doesn't carry the body's electrical signals. Dissolved minerals do. Magnesium, potassium, sodium and chloride help with hydration, the electrical charge across each cell membrane, and the signaling between cells and nerves. Together, the water and minerals carry the information into the body.

WHERE THE MINERALS COME FROM

The concentrate comes from Utah's Great Salt Lake, where the minerals occur together in a naturally balanced matrix, much as they are found in nature. It is diluted so it stays gentle for daily use, even when you take several Infoceuticals at once.

BENEFITS OF THE MINERAL BASE

- **Conductivity support.** Minerals help the body's natural electrical communication and signaling.
- **Broad-spectrum trace minerals.** Includes small amounts of naturally occurring supportive elements.
- **Purity focused.** The source material is screened for contaminants and heavy metals.
- **A solid imprinting foundation.** The concentrated mineral matrix is an excellent carrier for the information patterns.
- **Balanced electrolytes.** Magnesium, potassium, sodium and chloride support hydration and cellular communication.

What does it taste like?

You're tasting the minerals. The full-spectrum concentrate has a strong, slightly bitter mineral flavor. Most people prefer adding the drops to water or juice, which softens the taste, helps with hydration and makes it easy to take several Infoceuticals together. Taking them straight from the bottle is still fine if you prefer.

I noticed sulfur on the label.

That is naturally occurring trace mineral sulfur from the full-spectrum concentrate. It is not an added sulfite or a sulfur-based preservative, which are the forms some people react to. Sensitivities vary from person to person, so mention any concerns to your practitioner.

HOW TO TAKE YOUR INFOCEUTICALS

In water or juice

Add your drops to a glass of water or juice once a day, morning or evening.

Build up gently

6 → 9 → **15 drops**

Raise every 3 days, or follow your practitioner's plan.

Re-Scan & Support

Every 3 to 4 weeks your practitioner re-scans and builds your next protocol to work on the next layer of body-field correction.

Questions about your protocol? **Ask your E4L practitioner.** Shop: portal.e4l.com/shop e4l.com

Energy4Life products support general wellness. Infoceuticals are not medical devices or drugs and do not diagnose, treat, cure or prevent any disease. Statements have not been evaluated by the FDA.
